

Review for Lessons 34-40

*At first, try doing this **without looking in your book**. If you don't immediately recognize a component, try making an educated guess first. When you do need to look up a word or base, be sure to mark it – this will help you when studying later to determine which components need special attention.*

Break down the following words by identifying each component and giving its definition. Some words will have multiple prefixes, bases, or suffixes!
